# MaX UC

Expand your business's remote work capabilities with MaX UC.  As a Unified Communications tool it seamlessly addresses the mobility needs for remote and mobile workers with a simple and intuitive call experience.

This add-on Hosted PBX service extends a fixed-line service to mobile endpoints through a mobile application allowing you to make or receive calls anywhere from your computer or mobile device!

## Benefits

- Cost-effective, eliminate purchasing desk phones for the office
- Keep personal calls separate from work calls on one device
- One identity across all user devices

## Features

**Dual Calling Function**
- **Soft Phone**– make and receive VoIP calls from assigned Hosted PBX business number.
- **Network Voice**– calls to or from any caller are delivered via the mobile operator's cellular network.

**Video Calling–** uplift VoIP calls made using the softphone client to video without disrupting the call

**Mid-Call Function–** put calls on hold, transfer calls, and set up three-way calling.

**Access to CommPortal Features–** use Business Call Manager, Easy Call Manager or Incoming Call Manager, Visual Voicemail, and Click to Dial from the MaX UC Mobile UI.

**Business Contact Integration–** automatically see all Business Group contacts and any external contacts configured in the UI.

**User-configurable Caller ID–** choose between presenting the Business Group Line's directory number or configured Calling Party number as the caller ID on external calls.
